NOTICE OF INTENTION TO COMMENCE SMALL MINING OPERATIONS

The informational requirements of this form are based on provisions of the Mined Land Reclamation Act, Title 40-8, Utah Code Annotated 1953, as amended, and the General Rules as promulgated under the Utah Minerals Regulatory Program.

"Small Mining Operations" means mining operations which disturb five or less surface acres at any given time.

* * * * *

I. GENERAL INFORMATION (Rule R613-003-104)

1. Name of Claim/Mine: Honey Onyx Leases
2. Name of Operator/Applicant: FELLER HOLDING CORPORATION
Company () Corporation (X) Partnership () Individual ()
3. Permanent Address: 1051 North 1100 West
City: St. George, State: Utah Zip Code: 84770
Telephone Number: (801) 673-2349
4. Ownership of Land Surface:
Private (Fee) ☐ Public Domain (BLM) ☐ National Forest (USFS) ☐
State of Utah ☒ Other: _____
5. Ownership of Minerals:
Private (Fee) ☐ Public Domain (BLM) ☐ National Forest (USFS) ☐
State of Utah ☒ Other: _____

Utah Mining Claim Number(s) _____

Utah State Lease Number(s) ML 43753, ML 44563, ML 44849

6. Have the above owners been notified in writing? Yes X No ____
If no, why not? _____

7. Does the operator have legal right to enter and conduct mining operations on the land covered by this notice? Yes X No ____

II. PROJECT LOCATION & MAP (Rule R613-003-105)

1. Project Location (legal description):

County(ies): Juab
1/4, 1/4, 1/4: SW $\frac{1}{4}$ NE $\frac{1}{4}$ Section: 16 Township: 13 South Range: 1 West
1/4, 1/4, 1/4: NW $\frac{1}{4}$ NE $\frac{1}{4}$ Section: 16 Township: 13 South Range: 1 West
1/4, 1/4, 1/4: SE $\frac{1}{4}$ NW $\frac{1}{4}$ Section: 16 Township: 13 South Range: 1 West
all SLBM.

2. A topographic base map showing the location of the proposed small mining operation must be submitted with this notice. A USGS 7.5 minute series map is preferred. The areas to be disturbed should be plotted in sufficient detail so that they can be located on the ground. It is recommended that the operator also plot and label any previous disturbances in the immediate vicinity that he is not responsible for.

III. OPERATION PLAN (Rule R613-003-106)

1. Type of mining: Surface X Underground 1

2. Mineral(s) to be mined: CaCO3 Travertine Onyx

3. Provide a brief description of the proposed mining operation and onsite processing facilities. Material will be mined using a back-hoe and front end loader to load material into trucks for shipment from the site.

New Road(s): Length - (ft) Width - (ft)

Total project surface acreage to be disturbed - (acres)

IV. OPERATION AND RECLAMATION PRACTICES (Rule R613-003-107 & 108)

The reclamation and operation obligation is to keep the area clean and safe, minimize hazards to public safety, return the land to a useful condition, and reestablish at least 70 percent of the premining vegetative ground cover. To accomplish this, the operator will need to perform reclamation concurrently, or at the completion (within one (1) year) of mining:

1. Keep the mining operation in a safe, clean, and environmentally stable condition.
2. Permanently seal all shafts and tunnels to prevent unauthorized or accidental entry.
3. Plug drill holes with a five foot cement surface plug. Holes that encounter fluids are to be plugged in the subsurface to prevent aquifer contamination.
4. Construct berms, fences, or barriers, when needed, above highwalls and excavations.
5. Remove, isolate, or neutralize all toxic materials in a manner compatible with federal and state regulations.
6. Remove all waste or debris from stream channels.
7. Dispose of any trash, scrap metal, wood, machinery, and buildings.
8. Conduct mining activities so as to minimize erosion and control sediment.
9. Reclaim all roads that are not part of a permanent transportation system.
10. Stockpile topsoil and suitable overburden prior to mining.
11. Stabilize highwalls by backfilling or rounding to 45 degrees or less, where feasible; reshape the land to near its original contour, and redistribute the topsoil and suitable overburden.
12. Properly prepare seedbed to a depth of six inches by ripping, discing, or harrowing.
13. Reseed disturbed areas with adaptable species. (The Division recommends seeding 20 lbs./acre of native and introduced species of grass, forb, and browse seed, and will provide a specific species list if requested.)
14. Plant the seed with a rangeland or farm drill, or if broadcast seeded, harrow or rake the seed 1/4-1/2 inch into the soil - fall is the preferred time to seed.

V. VARIANCE REQUEST (Rule R613-003-109)

Yes ☒ No ☒

Any planned deviations from Rules R613-003-107, Operation Practices, R613-003-108, Hole Plugging Requirements, or R613-003-109, Reclamation Practices, as summarized above, should be identified below and justification given for the variance request(s).

Item Number

Variance Request Justification

VI. SIGNATURE REQUIREMENT

I hereby commit to conduct mining operations and to reclaim the aforementioned small mine as required by the Utah Mined Land Reclamation Act (40-8) and the rules as specified by the Board of Oil, Gas and Mining.

DIVISION OF

Ref: Our telephone conversation July 1st ~~Oil and Gas~~ MINING
State Leases ML 43753, ML 44563, ML 44849,
Notice of Intention to Commence Small Mining
Operations.

Dear Mr. Mansfield:

Feller Holding Corporation acquired the subject leases by assignment on July 5, 1990. Since that time there has been no production of limestone from the leases by said corporation. I have no way to establish any previous production.

To document previous disturbance and the surface conditions on the lease, photographs were taken on July 5th of this year showing the area of previous mining operations. Also a recent aerial photograph was obtained from the U.S. Soil Conservation Service at Nephi, Utah, covering Section 16, T. 13 S., R. 1 W., SLBM., that shows the mining disturbance within the leases. Copies of these photographs are enclosed.

Some mining is planned for the summer of 1991 and will be conducted on the eastern 400 to 500 feet portion of the vein in the E $\frac{1}{2}$ SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 16. Mining will be conducted as described in the enclosed Notice to Commence Small Mining Operation. "Material will be mined using a back-hoe and front end loader to load material into trucks for shipment from the site."

Sincerely,

Charles D. Snow

Charles D. Snow
Consulting Geologist

Encl: Notice of Intention to Commence Small Mining Operations, 2 copies of SCS photos and 6 color photos.
